

# Kangerlussuaq, Summer

---

Kangerlussuaq is mainly known as the airport and the international gateway to Greenland. However, there are much more to be seen here. Incredible sights, including fertile mountains, beautiful lakes and turbulent rivers.

Kangerlussuaq is the only destination in Greenland where you can actually drive by car to the inland Ice Cap - a three million cubic kilometres lump of ice!

Kangerlussuaq is also the place in Greenland where the Arctic wild life best can be experienced. The area is a resort for reindeer and musk oxen but also arctic foxes and arctic birds live in the region.

Our destination is the steep glacier front of The Russell Glacier, where you will experience the activity of the ice on warm summer days: Big pieces of ice falling off making big thunder-like noises.
